(54) Title: NAVIGATION SYSTEM

(57) Abstract: A navigation system is provided in which a mobile device (14) has a data receiving means capable of receiving images and an image display means (17), for example a mobile telephone with MMS capability for receiving an viewing images, A server (10) has a store of a plurality of images (12), each image representing a location and more than one image (12) being compilable to define a route between locations. The server has means for receiving a request and means for sending a series of images (12) to the receiving means of the mobile device (14). The store of the plurality of images (12) is keyed on locations of the images and a request specifies a location.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
